

Choonz Project : MoSCoW Analysis

Must Have	<p>A fully functional web application that enables the logged-in users to perform CRUD functionalities. 'Guests' can only view static webpages.</p> <p>It is unit, integration, system and acceptance tested.</p>
Should Have	<p>A web application that can be intuitively utilised with consistently styled web pages.</p> <p>It is statically analysed with Sonarqube.</p>
Could Have	<p>A web application with secured logging in functionality using Spring Security.</p>
Would Have	<p>A web application with session implementation to enable personal playlists only available to the user in session.</p>
